SUMMARY

My quantitative skills from my business degree along with my hands-on experience as a small-business owner help me designing, building and scaling consumer facing web applications. I hope to use these acquired skills while channeling my passion for finding cost-effective, efficient solutions. My diverse cultural and academic background makes me well-suited to handle quantitative tasks while interacting with people from varied backgrounds.

SKILLS

PROGRAMMING: Ruby, Javascript, Rails 5, Java, Jquery, Ajax, Ruby on Rails, Sinatra, Rspec, HTML / CSS
DATABASE: MySQL, SQL Server, API Implementation
LANGUAGES: English - Fluent, Spanish - Intermediate, Turkish - Fluent
PROFESSIONAL: Excellent communication skills, Motivated, productive and cooperative manner, Active listening and conflict management, Business Analysis

PROJECTS

GuideMe Oct, 2016
GuideMe is a Ruby on Rails application built in a two weeks for travelers who want to find a guide in a specific city. It is meant for an easy way for travelers to book a guide and communicate with them instantly using a built-in chat feature. In addition to being the team lead, I was responsible for all front-end development using CSS, jQuery and Ajax. We implemented various API's including Google Maps, Stripe, Yelp, Pixabay, Unslash and deployed our project to Heroku.

Labhub Oct, 2016
Labhub is a web application that allows scientists to create proposals which can be commented upon by other scientists. Once an admin approves the proposal, it becomes an experiment and the proposer can add collaborators, components, and comments. My role was the front-end by implementing jQuery and Ajax calls as well as the designing.

Veggiemon-Grow Won 2nd Place at the Food Hackathon Oct, 2016
Veggiemon-grow is an app that promotes kids eating healthier by aiming more outdoor activities and linking them to their local communities. We have build this app in using various APIs including google maps, nutritionix and yelp.

AWARDS

Food Hackathon + Forum San Francisco · Veggiemon-Grow 2nd place
Oct 2016
The Food Hackathon + Forum hosted this event to collaborate on creating, prototyping and birthing hardware and software solutions to some of the greatest challenges we face in feeding our future generations by attending this three day fully immersive educational experience. Veggiemon-grow is an app that promotes kids eating healthier by aiming more outdoor activities and linking them to their local communities. We have build this app in using various APIs including google maps, nutritionix and yelp.

EMPLOYMENT

Zeus Motors - Car Dealership
Co-owner/ General Manager · Mar 2013 to Dec 2015 · San Rafael, CA
- Developed business management and online marketing strategies to maximize sales.
- Generated over $1 million gross sales in first year. Reached $500k credit line access from lenders.
- Implemented effective customer service procedures to encourage positive feedback.
- Evaluated monthly revenue and prepared quarterly financial reports.
- Managed online marketing by creating new channels for converting leads to opportunities (lead nurturing emails), improving sales intelligence (lead scoring) and support a transition to increasing sales through prospecting.

San Rafael Smog
